

EMWIN and RANET Systems

The Emergency Manager's Weather Information Network (EMWIN)

The screenshot displays the EMWIN LOCAL DISPLAY software interface. The window title is "EMWIN LOCAL DISPLAY" and it includes a menu bar with "FILE", "SETUP", and "ABOUT". The main interface has a green border and contains the following elements:

- Header Bar:** "Active Country" (Cook Islands), "19/09/03", "EMWIN LOCAL DISPLAY", "13:23:28", "v2.00b", and "13".
- Left Panel:** A file list showing "gms005us.jpg" and other files like "G10FDIUS.JPG", "GMS005US.JPG", and "IMGSWPUS.JPG".
- Main Display:** A large satellite image of the Earth, showing the Cook Islands region. Above the image, the text "9 18 2003 2325Z" is visible.
- Bottom Panel:** A grid of buttons for various data sources and services, including "GMS", "GOES W", "Country Fcast", "N Cooks Area", "Marine Fcast", "Trop Wx Outlook", "Cyclones SWP", "Aviation Data", "CI Files", "Trop Wx Narrative", "Int'natnl Wx", "Pacific Synops", "Equake Data", "Tsunami Data", "SW Pac Image", "SW Pac Cyclones", "S Cooks Area", "All Files", "Wave Heights", "AVN Charts", "Cyclone Tracks", "World Image", "Emwin Sys Msg", "SatOps Msg", "Space weather", "Equake Map", and "EMAIL".

Vanuatu Project - Siviri Village RANET

- ▶ Information via HF Radio with simple HF Antenna
- ▶ WorldSpace broadcast via AsiaStar satellite
- ▶ Community FM Radio station, which is used for many purposes
 - ◆ Broadcasting local football matches to offshore islands
 - ◆ Education and health information
 - ◆ Community group information
 - ◆ Local music
 - ◆ Broadcast in local dialect

***Siviri Village
Installation and
testing***

***No power, no
telephone.***
