Question

What is the case for integrating gender and a focus on women into different CRI schemes and provider types at the macro, meso and micro levels ?

Gender inclusiveness is not about an exclusive focus on women at the exclusion of men

...**but** taking a focus on gender can lead to a specific emphasis on women

...and recognising that women and men are **not homogenous groups**

Gender

- the social relations between men and women
- socially constructed
- relations can change over time
