

WORLD RISK ADAPTATION FUTURES – SOCIAL PROTECTION

WEBINAR ON:

TRENDS IN CLIMATE CHANGE VULNERABILITY AND SOCIAL PROTECTION: What do we know on the global scale?

supported by the "World Risk and Adaptation Futures and Summer Academy" programme

23 September 2020

Organized by

In cooperation with

This session aims at assessing and discussing the state of knowledge regarding past and future trends in social protection and the relations of these trends to dynamics in climate change vulnerability. In doing so, the discussion will address likely future scenarios of the social-protection-vulnerability interface in order to inform adaptation needs and gaps. A particular focus will be on disparities in social protection coverage across as well as within societies. Knowledge gaps will be identified, allowing to explore urgent research needs for the future.

TIME

Central Europe
11:00 – 12:30h

Jakarta
16:00 – 17:30h

In this session, we aim to address the following questions:

- 1) How has the coverage with social protection been changing in the recent past?
- 2) Which variations between different world regions and countries can be observed?
- 3) Are world regions with the lowest social protection coverage also those with the highest climate change vulnerability?
- 4) What is the current knowledge on the effectiveness of social protection for climate change vulnerability reduction?
- 5) How social protection scenarios may look like in future and how are they likely to impact future vulnerability dynamics?
- 6) Which knowledge gaps do persist, requiring increased research efforts in the future?

AGENDA

TIME SLOT		ACTIVITY	WHO
Bonn	Jakarta		
11:00–11:05	16:00–16:05	Introduction to the session's aims and objectives as well as agenda	Koko Warner (UNFCCC)
11:05–11:15	16:05–16:15	Keynote	Matthias Garschagen (LMU)
11:15–11:35	16:15–16:35	Keynote	Terry Cannon (IDS)
11:35–11:50	16:35–16:50	Opening statements by other panelists:	Cecilia Costella (IFRC), Dunja Krause (UNRISD), Dominic Sett (UNU-EHS)
12:05–12:25	16:05–16:25	Questions by moderator mixed with questions from the audience	Koko Warner and all
12:25–12:30	16:25–16:30	Closing by moderator	Koko Warner

SPEAKERS / PANELISTS

LMU, Munich
Prof. Matthias Garschagen
(Chair in Human Geography)

IDS, Uni Sussex
Terry Cannon
(Senior Research Fellow)

IFRC Climate Center/Uni Twente
Cecilia Costella
(Senior Technical Adviser)

UNU-EHS
Dominic Sett
(Project Associate)

UNRISD
Dunja Krause
(Research Officer)

UNFCCC
Dr. Koko Warner
(Manager, Adaptation Programme)
