- **Over US\$ 100 million in premiums generated**
- **13-month persistency of 82% (as of July 2010)**
- **1st expense underrun expected for FY 2010/2011**

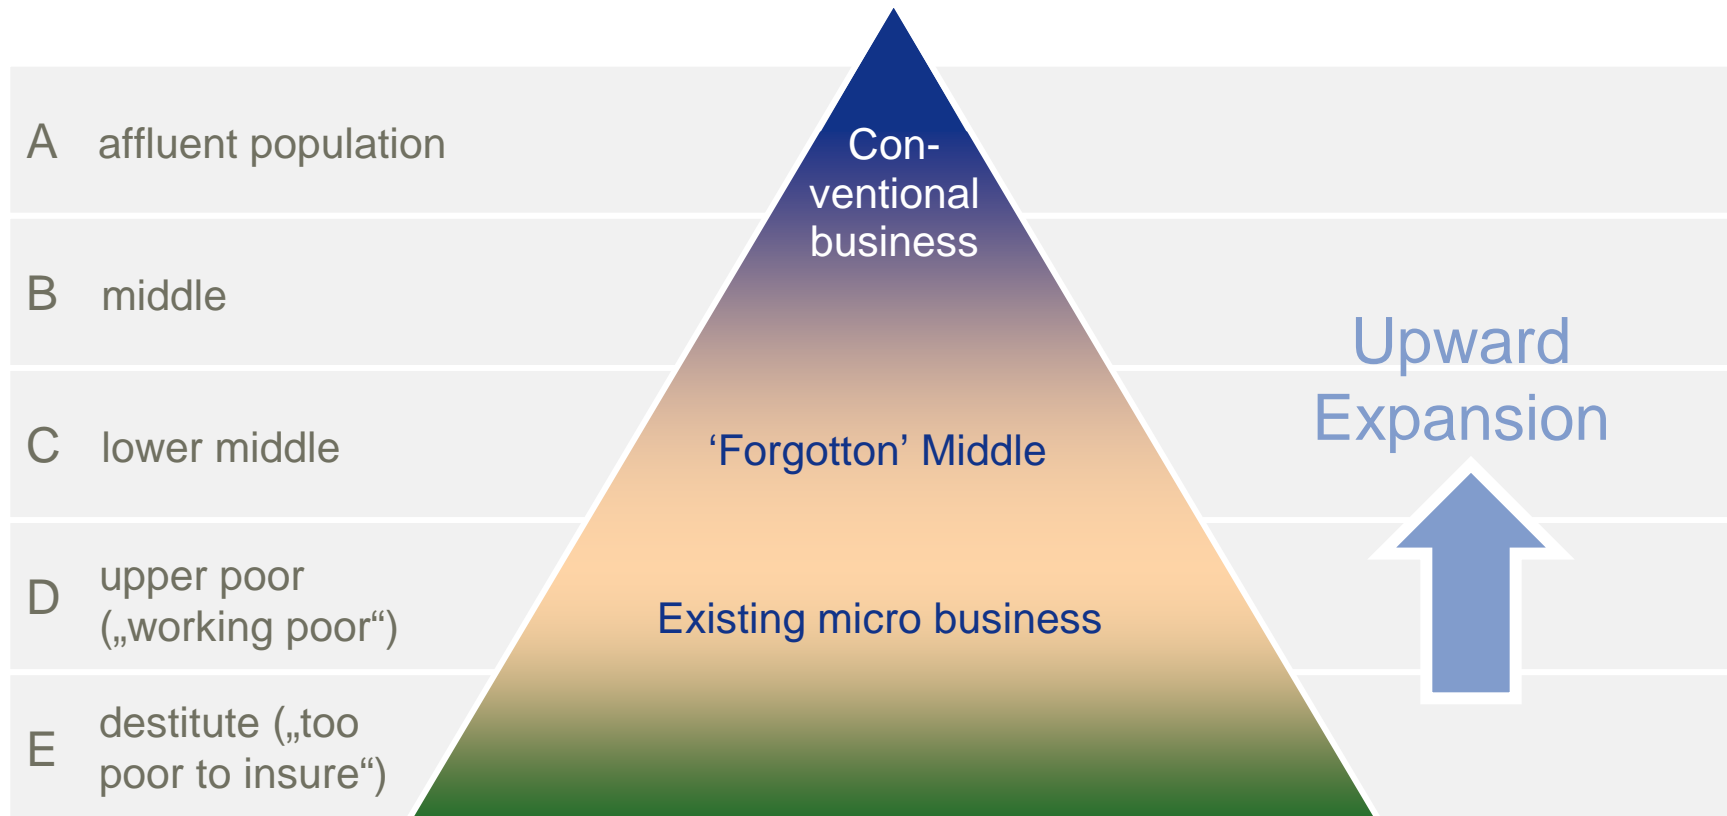

SSS Product Features @ SKS

Product type	<ul style="list-style-type: none"> ▪ Voluntary group insurance ▪ Combines systematic savings and protection
Premium	<ul style="list-style-type: none"> ▪ US\$ 0.4 per week
Premium Paying Term / Policy Term	<ul style="list-style-type: none"> ▪ 5 years
Premium usage	<ul style="list-style-type: none"> ▪ Net of Scheme Administration charges ▪ Invested by BajajAllianz in Government securities and secure assets
Maturity Benefit	<ul style="list-style-type: none"> ▪ Account Value after 5 years (Net Premium + Interest)
Natural Death Benefit	<ul style="list-style-type: none"> ▪ US\$ 100 + Account Value
Accidental Death Benefit	<ul style="list-style-type: none"> ▪ US\$ 200 + Account Value
Surrender	<ul style="list-style-type: none"> ▪ After minimum 6 month ▪ Account Value – Surrender Charges

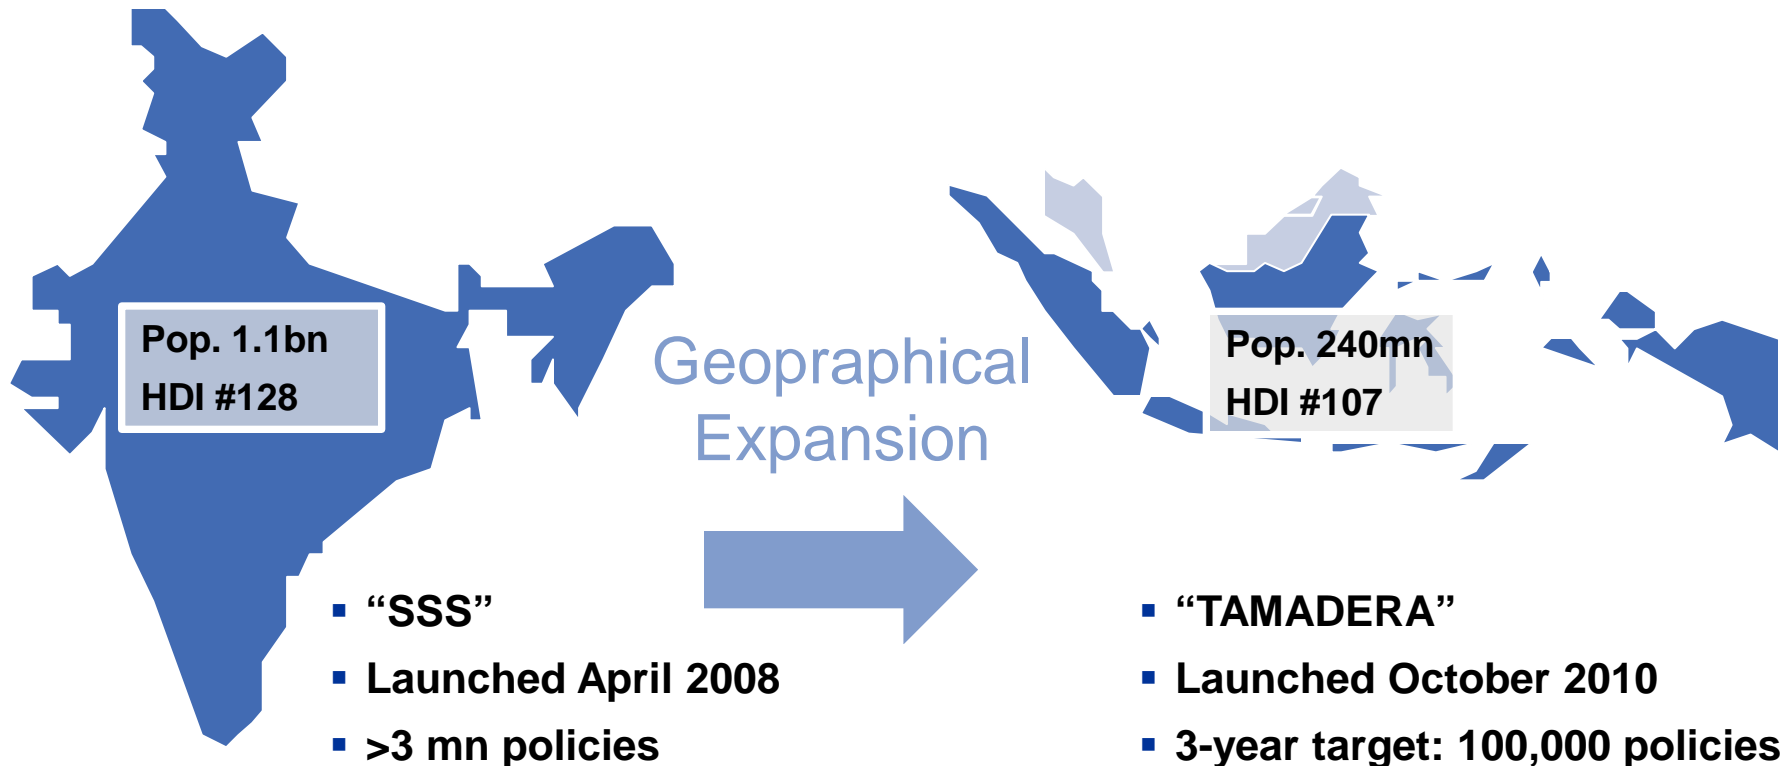

Success factors & Challenges

Success Factors	Challenges (and Mitigation)
<ul style="list-style-type: none"> ▪ High customer demand ▪ Strong distribution partners (SKS, Coops, Regional Rural Banks [RRBs]) ▪ Simple Product ▪ Simple Processes 	<ul style="list-style-type: none"> ▪ Low financial literacy <ul style="list-style-type: none"> → Financial Literacy campaign underway ▪ IT system at partner level <ul style="list-style-type: none"> → IT system upgrade at SKS about to be completed ▪ Initial reliance on one major distributor <ul style="list-style-type: none"> → Partner network is growing fast → Expansion into higher market segments ongoing

Emerging Trend: Opportunity at the 'forgotton' Middle of the Pyramid, e.g. through RRBs

Geographical Expansion: Taking SSS to Indonesia

... but every market is different ...

Example	India	Indonesia	Indonesia vs. India
Distribution	High number of large partners (MFIs, RRBs, Coops)	Fragmented, small number of large partners	Harder to reach scale
Poverty level (US\$ 2/day)	80.4%	52.4%	Higher premium payment capacity
Literacy	Low (20% of SKS customers)	High (80% of MFI customers)	Easier to communicate product features
ROSCAs	Not pervasive (“Chit Funds”)	Pervasive (“Arisan Funds”)	Stronger competition from informal savings
Life coverage	Highly valued	Not highly valued (taboo)	Life coverage alone not a strong selling proposition

... so products need to be adapted ...

Product Feature	SSS 	TAMADERA 
Minimum Premium	US\$ 0.4/week	US\$ 1/week
Natural Death	✓	✓
Accidental Death	✓	✓
Critical Illness Rider	✗	✓
Product Complexity	Low	Slightly higher (CI waiting periods, CI exclusions, health questionnaire)

- Higher TAMADERA minimum premium (1) accounts for less scale opportunities and (2) relies on higher premium payment capacity
- CI rider (1) distinguishes from informal savings, (2) compensates limited attractiveness of life coverage and (3) relies on higher literacy

... while still keeping things as simple as possible
