On 1st January 2018 NAICOM's (National Insurance Commission) new microinsurance guidelines came into force. The guidelines include both a qualitative and quantitative definition of microinsurance setting a maximum limit on the sum insured. All microinsurance intermediaries are required to obtain a licence and the guidelines list out a broad range of different types of entities which are eligible to apply. Caps are placed on the level of acceptable commissions for both life and non-life insurance business. A dedicated microinsurance licence is also foreseen with lower capital requirements. All microinsurance products are subject to the Commission’s approval. The guidelines also seek to ensure consumer protection through simplified disclosure requirements, restrictions on claims payment periods and establishment of complaints management systems.

Regulatory Snapshot
